

Sadeq Yaqobi

FRONTEND DEVELOPER

ABOUT ME

As a frontend developer, I have good technical knowledge in HTML, CSS, JavaScript and frameworks like Bootstrap. In addition to my technical knowledge, I also bring excellent problem-solving skills, attention to detail, effective communication skills, and a passion for constantly learning and keeping up with the latest industry trends. My ability to quickly research and adapt new technologies allows me to deliver innovative and efficient solutions.

EDUCATIONAL EXPERIENCE

In the courses of my educational career I have acquired:

- Developing JavaScript skills through challenging projects.
- Exploration of modern frameworks such as React and Vue.js.
- Acquiring knowledge of WordPress, including theme customization and plugin development.
- Performing responsive web design exercises
- Participate in educational challenges and active learning over 180 days.
- Demonstrating a proactive approach to continuous improvement.

During my educational journey, I tackled and completed 14 educational projects, all of which you can find on [GitHub](#).
